

ACION 8000 Series

A8KFT3UD-13 1310nm (1.2GHz) Dual Forward Optical Transmitter

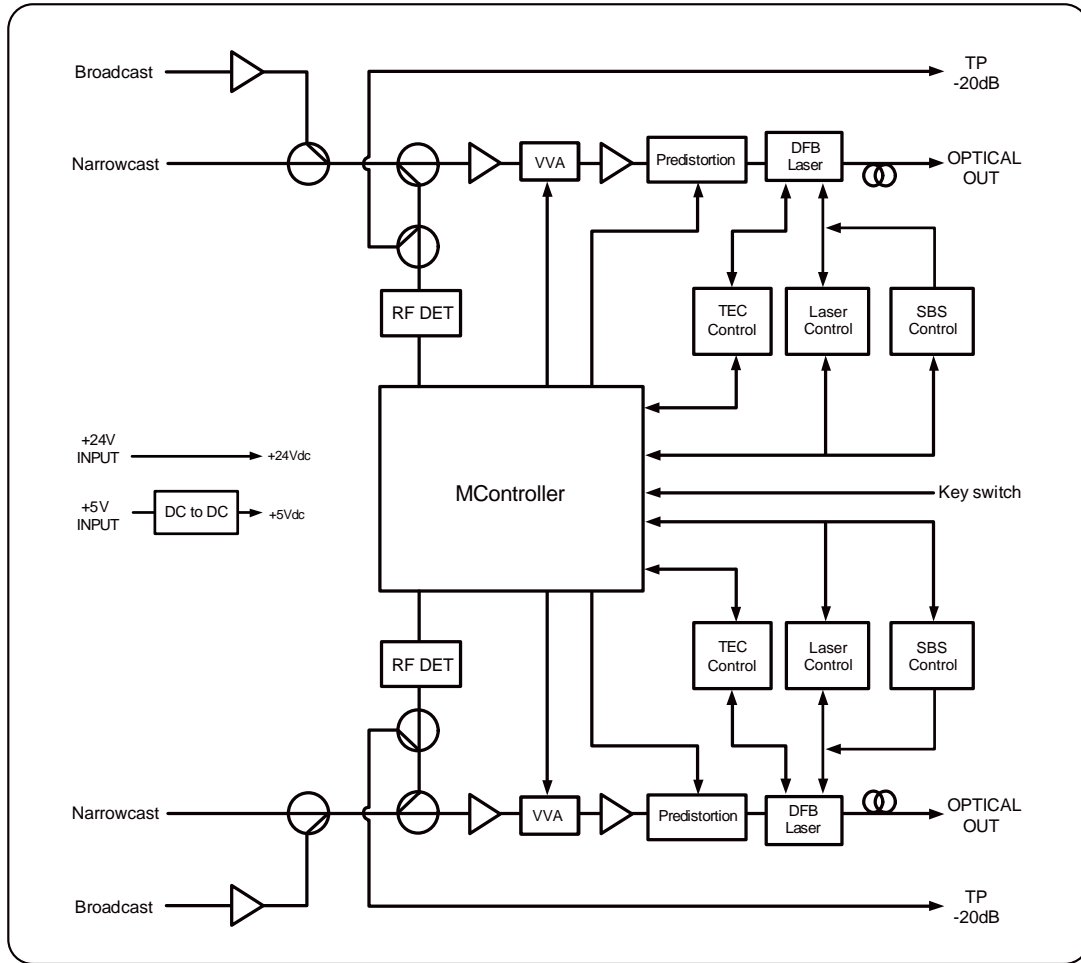

The ACION 8000 A8KFT3UD-13 is a head-end 1310nm 1.2GHz dual forward optical transmitter (Tx) for HFC or FTTH applications. This compact and cost-effective Tx module is 3RU in height and up to 12 Tx modules (24 transmitters) can be integrated in the 19-inch 3RU high-density chassis (A8KMF3).

The transmitter's adjustable OMI level and user define AGC setting features make it very convenient in field application with a wide range of RF input loading. The transmitter's RF path employs several stages of RF amplification that includes single ended low noise high linearity amplifiers and low noise push-pull amplifiers from G7/EU brand name vendors.

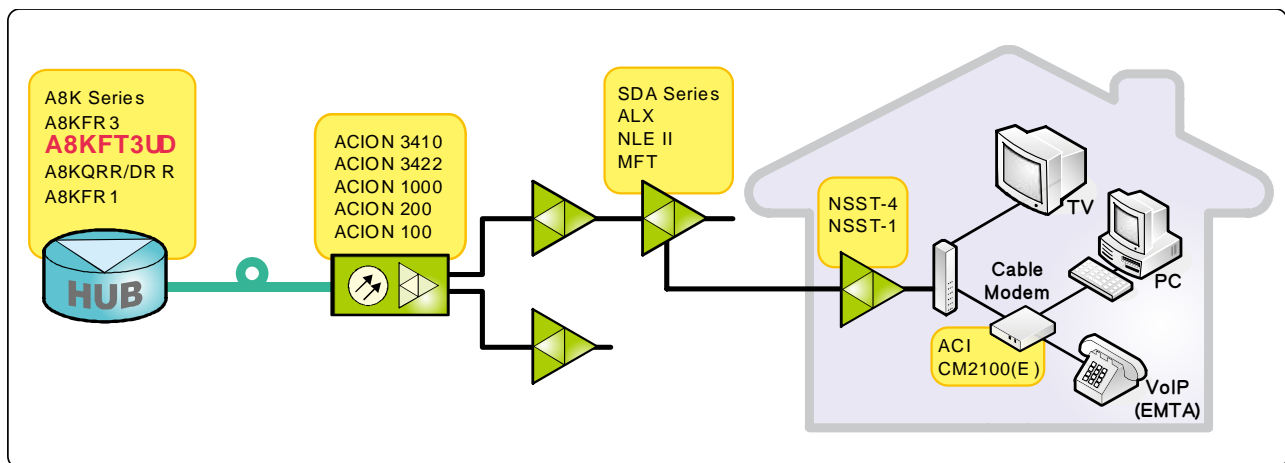

Features

- ◆ Dual transmitters in one module.
